General Specification of Cytocentrifuge

The equipment should be a Bench-top centrifuge for cytology specimens and should be capable of thin-layer cell preparation for retrieving cells from various body fluids as well as preserving their morphology:

1. Should be capable of processing up to 12 specimens at one time
2. Should be designed for easy disinfection and also have a wipe- clean control panel
3. Should be resistant to fluid spillage on the electronic components with capped disposable sample compartments/ chambers for elimination of aerosol
4. Inbuilt safety alarms during all stages of operation should be available
5. Microprocessor based controls and programming for time and speed with pull-out program card for fast retrieval
6. Should be compliant with international standards for electrical equipment requirements for laboratory use
7. Voltage requirement : 220 V, 50Hz
8. RPM should be 200 to 2,000.
9. Added function of cell block preparation is desirable.
10. Should have digital display for speed and time
11. Sample compartments/ chambers for elimination of aerosol.
12. Safety alarms during all stages of operation should be available
13. Essential accessories like filter cards, cytoclips, funnels etc to be supplied with the system
14. Document supporting track record and satisfactory performance from institution of national importance should be provided
15. Manufacturing company should be ISO Certified.
16. Equipment should be USFDA and European CE approved.
17. Demonstration of the instrument should be mandatory for technical qualification.

Additional essential feature should be available in the quoted model:

1. System is suitable for cell block preparation.
2. The prices for all the required proprietary consumables to be provided and freezed for next 5 years.
